GAIL S. SHAFFER
SECRETARY OF STATE

STATE OF NEW YORK: DEPARTMENT OF STATE
BUFFALO/ROCHESTER UNIFORM CODE BOARD OF REVIEW

In the Matter of the Petition of:
Gary Stern
For a Variance to the New York State
Uniform Fire Prevention and Building Code

INTERMEDIATE DECISION

PETITION NO. 525-89-28

On reading and filing the petition made pursuant to 19 NYCRR 450 by Petitioner, and upon receiving evidence and hearing argument thereon at the hearings held for this same building under Petition No. 370-88-28 at the State Office Building, 65 Court Street, Buffalo, New York, on December 8, 1988, and at the request for a rehearing at 189 North Water Street, Rochester, New York, on July 12, 1990, and at the Donovan State Office Building, 125 Main Street, Buffalo, New York, on December 13, 1990, the Board finding and concluding that strict compliance with 9 NYCRR Section 769.1 would entail practical difficulties or unnecessary hardship and would be unnecessary in light of alternatives which ensure the achievement of the code's intended objective or in light of alternatives which, without a loss in the level of safety, achieve the code's intended objective more efficiently, effectively, or economically: the Board reverses their previous decision for Petition No. 370-88-28 as follows:

With respect to alterations to create an atrium in an existing three-story building of type 3 (heavy timber) construction, for C1/C2 (business/mercantile) occupancy, having a gross floor area of 270,000 square feet, and located outside fire limits at 274 N. Goodman Street, Rochester, New York, a

variance is granted in 9 NYCRR 769.1 to permit an atrium in a building of type 3 construction; with the following conditions:

- The roof ceiling assembly shall be upgraded to provide a one hour fire resistance rating.

- The fire and smoke detection system provided throughout the entire building shall be verified to comply with 9 NYCRR Section 1060.3.

- Sprinkler heads shall be provided around each atrium opening, spaced no more than 6 foot on center.

- The building shall comply with all other provisions of the Uniform Code as determined by the City of Rochester code enforcement personnel.

The Board's decision is based on the following findings:

1. On December 8, 1988, the Board denied a variance request for this building under Petition No. 370-88-28 to 9 NYCRR Section 769.1 to permit two openings totalling approximately 4,004 square feet in Section B in the second floor of a three-story building of type 3 construction.

2. The denial was based on: The lack of opening protectives at several openings within the masonry firewalls surrounding Section B; inoperative sprinkler system and fire hydrants, unilluminated exit signs, use of the building as a nightclub without prior approval, poor housekeeping; and there were no alternatives proposed to compensate for the downgrading in safety that the variance would have created. A request to reverse the decision of December 8, 1988, was heard on July 12, 1990. The request identified atrium openings in Section B that were reduced to approximately 2,000 square feet, which is one half of the size of the previous openings. Petitioner offers a fire and smoke detection system connected to a central alarm, which exceeds the minimum requirement of the Uniform Code, as an alternative, and evidence that housekeeping and maintenance of all systems has improved and meets the approval of the Code enforcement official.

3. Testimony and documentation established that the building complies with the Uniform Code for type 3 construction except for the roof structure which consists of unprotected steel trusses.

4. The City of Rochester testified that a full code review of the building has not been performed.

5. The building is an existing vacant building that was rehabilitated and converted into a shopping center which requires the proposed atrium to provide a marketable atmosphere for the building.

6. The building is fully sprinklered as required by the Uniform Code and is equipped with sprinkler heads surrounding each atrium opening.

Furthermore, it should be noted that the decision of this Board is limited to the specific building and application before it, as contained within the petition, and should not be interpreted to give implied approval of any general plans or specifications presented in support of this application.

This Intermediate Decision is to be deemed final by the Code Enforcement Agency and for purposes of the commencement of a proceeding under Article 78 of the Civil Practice Law and Rules by any aggrieved party. In the event of the commencement of such a proceeding, the final decision containing full findings of fact and conclusions of law shall issue forthwith and shall be deemed to have been issued on the date below.

Chairman F. Robert Danni and members John J. Lauchert, Arun Gade, and Ann Naeseth Schubert all concur. Member Stephen Trenton abstains.

January 4, 1991

City of Rochester Fire Department
Office of the Fire Marshal, Room 300
Public Safety Bldg, Civic Center Plaza
Rochester, N.Y. 14614

Dear Sir:

This morning two of your fire marshals visited our store. This was in connection with the sprinkler system head distances from merchandise.

Please be advised that we have been at this location (Village Gate Square) since 1983. We have always been advised that our books on the top shelf should be 18 inches from the sprinkler head. We have tried to maintain this to the satisfaction of all previous inspectors without a problem.

This morning your two men advised us that the previous regulation of 18 inches is not sufficient. We are now to remove all of our books from the top shelves, which is about 1500 volumes. This constitutes 15% of our stock and 20% of the actual value of the merchandise in the store. We cannot maintain our business with such a sudden loss of valuable selling area and merchandise.

This will mean redesigning our custom made bookcases and rebuilding them to accommodate the taller volumes that are currently on the top shelf. This is a very serious and alarming prospect for us. We ask that you allow us to maintain the current 7-year rule of "18 inches from the sprinkler head" (article 1163.13b-5) as we have done since we came to this location.

We are trying to do our part to rebuild Rochester's commercial identity of cultural uniqueness. Ruling adversely in this matter will force us to entertain other alternatives at a time when recession looms as a prospect. It will substantially hurt the few remaining dealers on our floor if we should be forced to leave.

Sincerely,

John Westerberg

(b) Sprinklers in the beam openings are located within 1 in. (25 mm) horizontally of the opening center line,

(c) The branch line is located within 1 in. (25 mm) horizontally of the opening center line, and

(d) Sprinklers on alternate lines are staggered.

4-2.4.5 Bar Joists. Sprinklers shall be at least 3 in. (76 mm) laterally from web members of open bar joists which do not exceed ½ in. (13 mm) and at least 6 in. (152 mm) laterally from web members which do not exceed 1 in. (25 mm). When the dimensions of the web member exceed 1 in. (25 mm), see 4-2.4.1.

4-2.4.6* Beams. Deflectors of sprinklers in bays shall be at sufficient distances from the beams, as shown in Table 4-2.4.6 and Figure 4-2.4.6, to avoid obstruction to the sprinkler discharge pattern. Otherwise the spacing of sprinklers on opposite sides of the beams shall be measured from the center line of the beam and the distance shall not exceed one-half of the allowable distance between sprinklers.

NOTICE OF VIOLATIONS

Mr. Gary I. Stern
40 Evandale Road
Rochester, New York 14618

June 6, 1990

PLEASE TAKE NOTICE

An inspection at 274 N. Goodman Street has revealed violations of the Fire Prevention Code of the City of Rochester and/or the Codes, Rules and Regulations of the State of New York.

Orders are hereby issued for the violation(s) to be corrected on or before the reinspection scheduled for June 18, 1990.
