Property subject to the applicability of this code shall be provided with safe means of egress.

Historical Note

Sec. filed Dec. 13, 1983 eff. Jan. 1, 1984.

§ 1162.2 Obstruction.

(a) Exits shall be maintained to provide free and unobstructed egress from all parts of the building or structure.

(b) No barrier, lock or fastening device to prevent free escape from any building or structure shall be installed, except in institutions where supervisory personnel are constantly on duty and effective provisions are made to remove occupants in case of fire or other emergency or as permitted in sections 5-2.1.5 and 5-2.1.6 of reference standard RS 54-1 (see section 1250.3 of this code).

Aisles, corridors or passageways leading directly to every exit shall be created and maintained in open floor areas where exits are not immediately accessible. (c) A sign reading "EXIT," and indicating the direction, shall be placed in every location where the direction of travel to reach the nearest exit is not immediately apparent.

Historical Note

Sec. filed Dec. 13, 1983; amd. filed July 7, 1995 eff. July 26, 1995. Amended (b).

§ 1162.4 Elevator warning signs.
